Revision of NWSDB Rates 2021.

The rates of NWSDB 2021 rate book was subjected to a revision after 3 months period of initial publication due to the current volatile market situation. Therefore, mainly considering the freight rate increase in the global shipping industry and the FOB increases due to the material price increase, relevant rates of the 2021 rate book was revised. Further, overall impact from the steel price increase and other influences in local market and small deviation of the exchange rate increase of USD also have considered for the rate revision. New base exchange rate of USD is LKR 203.00 and Euro is LKR 233.00.

Moreover, as per the board circular issued by NWSDB General Manager dated on 15th of November 2021, "Opening of Letter of Credit for the Foreign Component of Supplies", relevant to the Letter of Credit (LC) openings for the NWSDB projects has considered for the rate revisions of supply items as well.

Accordingly, the rates in NWSDB 2021 rate book shall be revised as given in the following table until another review or issuance of 2022 rate book.

DI supply revised tables, Day Work and Basic rates of labour are attached here with.

Rate Book Section	Sub Section	Increase Percentage		
		Other	Supply Items	
			LC Processed by NWSDB	LC Processed by Contractor
