PE Pipes & Fittings in Replacement of PVC

National Water Supply & Drainage Board has decided to use Poly Ethylene (PE) pipes in the distribution systems in order to reduce NRW based on the studies carried out in the water supply schemes where PE pipes have already laid.

Local PVC manufactures have been informed already in March 2012 to commence manufacturing PE Pipes, Fittings & Accessories to be used in the water supply schemes.

As an initial step, you are hereby instructed to design distribution pipe lines up to and including 250mm dia. for PE pipes.

General Manager

- CC : 01. Chairman
02. Vice Chairman
03. Working Director
