

3 After commissioning of the scheme

- i. Agreement can be signed with consumer to provide the service connection after commissioning the scheme.
- ii. O&M staff can precede the balance connection work after the consumer pays the estimated value to the NWSDB.
- iii. The O&M Section shall flush the Service Connection from the end cap using compressed air or high pressure water to clean the possible ferrule blockage during the cleaning of water main.
- iv. The O&M Section can then provide the service connection after installing the water meter and the other relevant specials.
- v. The Engineering Assistant/Fitter who was involved in obtaining details, estimates and supervising during the construction stage should be involved with the connection works, wherever possible.

You are hereby instructed to follow the above instructions with immediate effect.
