**BSI Standards Publication** 

Industrial valves — Face-to-face and centre-to-face dimensions of metal valves for use in flanged pipe systems — PN and Class designated valves

### National foreword

This British Standard is the UK implementation of EN 558:2017. It supersedes BS EN 26554:1991 and BS EN 558:2008+A1:2011 which are withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PSE/18/1, Industrial valves, steam traps, actuators and safety devices against excessive pressure - Valves - Basic standards.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

**EN 558** 

February 2017

ICS 23.040.99; 23.060.10

Supersedes EN 26554:1991, EN 558:2008+A1:2011

**English Version** 

# Industrial valves - Face-to-face and centre-to-face dimensions of metal valves for use in flanged pipe systems - PN and Class designated valves

Robinetterie industrielle - Dimensions face-à-face et face-à-axe de la robinetterie métallique utilisée dans les systèmes de canalisations à brides - Appareils de robinetterie désignés PN et Class Industriearmaturen - Baulängen von Armaturen aus Metall zum Einbau in Rohrleitungen mit Flanschen -Nach PN und Class bezeichnete Armaturen

This European Standard was approved by CEN on 25 December 2016.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

This document (EN 558:2017) has been prepared by Technical Committee CEN/TC 69 "Industrial valves", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2017, and conflicting national standards shall be withdrawn at the latest by August 2017.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 558:2008+A1:2011 and EN 26554:1991.

The main changes to the previous edition are the following:

- PN 500 has been deleted from the scope;
- Figure 4 has been updated;
- 4.2.4 for raised face flanges has been simplified and Figure 6 has been deleted;
- DN 1050 has been added in the scope, Table 2 and Table B.1;
- Basic series 111 to 124 have been added in Table 2 and in Table A.1;
- FTF series 117 to 121, Class 250 and Class 600 have been added in Table 12;
- FTF series 111 and 112 have been added in Table 13;
- A new Table 16 was added for steam traps.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

BS EN 558:2017 EN 558:2017 (E)

### Introduction

The basic series given in this document are taken from the original series shown in Annex A. Changes made to the original series will not be automatically incorporated into this document.

The numbers of the existing ISO basic series are maintained as in ISO 5752:1982.

4

### 1 Scope

This European Standard specifies the "face-to-face" (FTF) and "centre-to-face" (CTF) dimensions for PN and Class designated metal valves used in flanged pipe systems.

This European Standard covers valves with the following PN, Class and DN values:

- PN 2,5; PN 6; PN 10; PN 16; PN 25; PN 40; PN 63; PN 100; PN 160; PN 250; PN 320; PN 400;
- Class 125; Class 150; Class 250; Class 300; Class 600; Class 900; Class 1 500; Class 2 500;
- DN 10; DN 15; DN 20; DN 25; DN 32; DN 40; DN 50; DN 65; DN 80; DN 100; DN 125; DN 150;
   DN 200; DN 250; DN 300; DN 350; DN 400; DN 450; DN 500; DN 600; DN 700; DN 750; DN 800;
   DN 900; DN 1 000; DN 1050; DN 1 200; DN 1 400; DN 1 600; DN 1 800; DN 2 000.

For valves in other shell materials than metal the same FTF and CTF dimensions may be used.

For relationship between DN and NPS see Annex B.

### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 736-1, Valves - Terminology - Part 1: Definition of types of valves

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 736-1 and the following apply.

3.1

face-to-face dimensions

(FTF)

[straight pattern valves]

distance between the two planes perpendicular to the valve axis located at the extremities of the body end ports or as specified in the relevant valve product standard

Note 1 to entry: See Figures 1 to 4.

Note 2 to entry: In millimetres.

3.2

centre-to-face dimensions

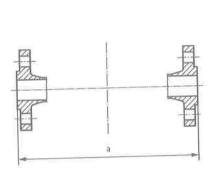

(CTF)

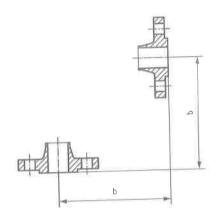

[angle pattern valves]

distance, between the plane located at the extremity of either body end port and perpendicular to its axis and the axis of the other body end port

Note 1 to entry: See Figures 1 to 4.

Note 2 to entry: In millimetres.

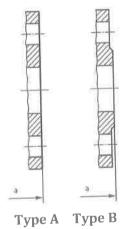

### Key

- a face-to-face (FTF)
- b centre-to-face (CTF)

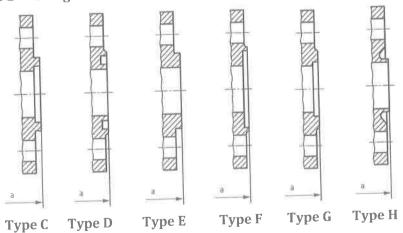

Figure 1 — Face to face and centre to face dimensions

### Key

a face-to-face (FTF)

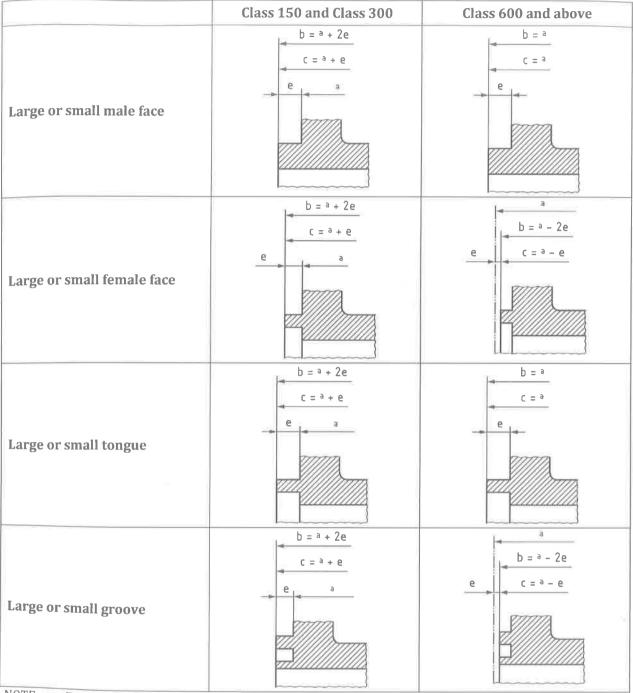

Figure 2 — Flanged valves PN and Class designated (flat and raised faces)

Key

a face-to-face (FTF)

- c centre-to-face (CTF)
- e elevation

 $Figure\ 4--Flanged\ valves\ Class\ designated$ 

### 4 Dimensions and tolerances

### 4.1 Basic series

The basic series of FTF and CTF dimensions shall be as given in Table 2,

## 4.2 Face-to-face and centre-to-face dimensions

### 4.2.1 General

The FTF and CTF dimensions shall be in accordance with Figures 1 to 4 and Table 2.

For each type of valve, the basic series to be taken into consideration are given in Table 5 to Table 16.

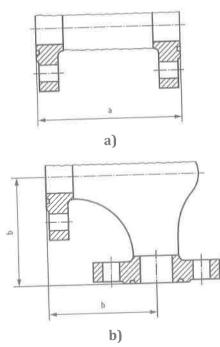

NOTE 1 Table 2 gives complete series. In Table 5 to Table 16, the columns of series may be incomplete.

NOTE 2 For certain sizes/types of valves, alternative dimensions are permitted and these are specified in Table 5 to Table 16 as appropriate.

NOTE 3 The origin of the basic series is shown in Annex A (informative).

## 4.2.2 Class designated valves with ring joint flanges

For Class designated valves with ring joint flanges, the FTF or CTF dimensions given in Table 2 shall be increased by x as defined in Table 1 and Figure 5.

### Key

- a FTF = Dimension of Table 2 + x
- b CTF = Dimension of Table 2 + 0.5 x

Figure 5 — FTF and CTF dimensions for Class designated valves with ring joint flanges

800	=					
900		28,6	15,9			
1 000						

### 4.2.3 Valves with lining

For valves having a resilient lining which forms the gasket joint with the mating flanges, the FTF and CTF dimensions shall be the distance between the extremities of the valve in the installed condition. If the dimensions for CTF and FTF differ from the standard dimensions, they shall be given by the manufacturer.

For valves having a resilient or hard lining, the thickness of the lining on the mating surface shall be included in the FTF and CTF dimensions given in Table 2, unless the design of the valve precludes such an inclusion.

If this is the case, the manufacturer shall indicate the deviation from the standardized FTF or CTF dimensions in his documentation.

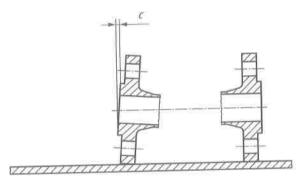

### 4.2.4 Raised face flanges

The raised face dimensions shall be in accordance with the applicable flange standard.

### 4.3 Tolerances

Tolerances on FTF and CTF dimensions are given in Table 3. Both tolerances shall be fulfilled.

End flange seating surfaces shall be parallel or perpendicular. Tolerances "c" on the parallelism or perpendicularity as shown in Figure 6 are given in Table 4.

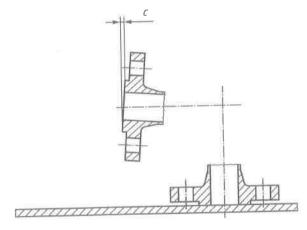

Figure 6 — Tolerances on parallelism and perpendicularity

Table 2 — Dimensions of basic series

Dimensions in millimetres

a This series is used for grey cast iron gate valves isomorphic series (details see relevant product standards),

b This series applies only to PN 63.

c This series applies to copper alloy valves only; not to be used for cast iron or steel valves.

d For flanged and wafer types.

e These dimensions apply to pressure seal or flangeless bonnet valves. They may be applied at manufacturer's option to valves with flanged bonnets.

<sup>a</sup> For lift check valves – angle pattern see Table 10.

<sup>b</sup> This series applies to copper alloy valves only; not to be used for cast iron or steel valves.

For PN 16, Class 150 lift check valves in steel, use: 356 (DN 125); 406 (DN 150).

d For PN 40, Class 300 lift check valves in steel, use: 203 (DN 25); 216 (DN 32); 229 (DN 40); 559 (DN 200).

e For PN 16 valves in cast iron, use: 965 (DN 450).

 $^{\rm f}~$  For PN 16 swing check valves in steel, use: 864 (DN 400).

## British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

### About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards -based solutions

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

### Information on standards

We can provide you with the knowledge that your organization needs to succeed, Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

### **Buying standards**

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

### Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit, or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

### Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than 1 device provided that it is accessible
  by the sole named user only and that only 1 copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced in any format to create an additional copy.
   This includes scanning of the document.

If you need more than 1 copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

### Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright & Licensing team.

### **Subscriptions**

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email subscriptions@bsigroup.com.

### Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
